

EcoRegion sustainable development measure

Ludwigslust County - Social analysis 2010

EcoRegion Partner Conference in Tallinn, 28.09.2010

... projects of Ludwigslust County

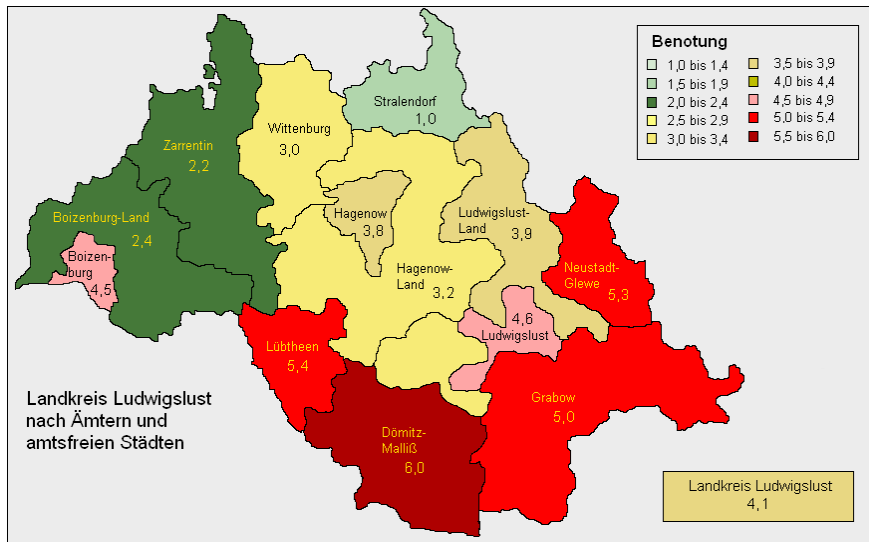

- Renewal of social analysis as planning instrument of the youth welfare service and enquiry of her influence in terms of sustainability and political decision making in the rural social room
- Introduction of a motivational and qualificational measure for achieving behavior-based energy savings at schools in ownership of the county
- Development of adapted and coordinated rehabilitation measures along river Rögnitz under consideration of the ownership and utilisation situation

Social analysis 2010 – starting point

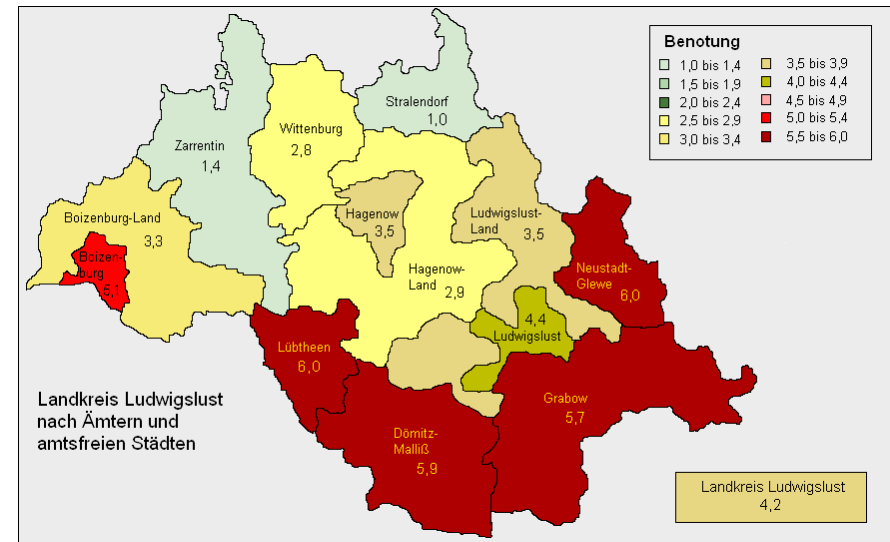

- Renewal of analysis from 2006 → comparison of development
- Identification of lacks and deficits (risks) in the field of offering youth welfare services
- Analysis on basis of 9 municipal confederations and 4 municipal towns
- Calculation system consisting of: 46 subsidiary indicators → 13 indicators → 4 indices → **total risk**

Population structure index

Consisting of indicators: demography, politics

2006

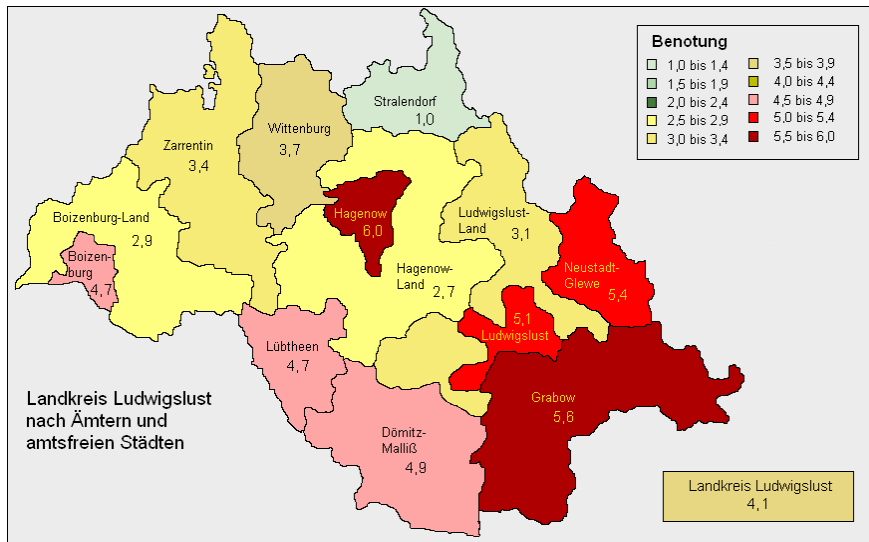

2010

Founding of a task force in Grabow district

- District was chosen because of high total risk, but at the same time very energetic social actors and good social networks
- Members: mayor, administration, headmaster of regional school, school social worker, district social workers, members of social board, county department for youth
- Analysing results of analysis → finding solutions /concrete projects:
 - integration of reg. school into Service Point school – vocation (pilot)
 - raising attractiveness of official internet portal

Developing the **BalticSeaRegion**
into the world's first EcoRegion

Public presentation of results in Grabow, 16.09.2010

21 (!) presentations so far...
Transfer of results

Thank you very much for your attention!
